1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 29, 2005 has been entered.

2. Claims 1-3 and 20-27 and are now pending in this application.
Claims 4-19 and 28-32 have been cancelled.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

i. Claims 1-3 and 20-27 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 0191513 further in view of Tetsuya et al JP60030668.

The reference teaches compositions containing at least 5% of a food composition comprising *Kluyveromyces lactis* which renders the claims unpatentable, see Examples

Art Unit: 1651

in particular whereby K. lactis is in an aqueous slurry that is 0.2 kg/0.9 kg or 22.2% that meets the claimed limitation. This mixture is further heated which meets claim 25.

If there are any differences with respect to the amounts, type or form of yeast, these differences would have been prima facie obvious to one of ordinary skill in the art absent unexpected or unobvious results. It is noted that the yeast per se is a food which aqueous mixture is a composition that renders the claims unpatentable for the drink per se. The reference to DSMZ, [www.dsmz](http://www.dsmz.de) for Kluyveromyces marxianus 1425 deposited August 1982 and 7238 (1992) which reference teaches that the product is known as a lyophilized yeast which would be prima facie obvious to one of ordinary skill in the art to employ this form or other forms in the process of EP0191513. It would have been prima facie obvious to employ combination of yeasts as disclosed by Tetsuya et al which includes K. lactis in combination with other known yeasts which includes K. marxianus (fragilis) absent unexpected or unobvious data.

4. **No claim is allowed.**
